

## SAYANTON DIBBO

---

CONTACT INFORMATION	15 Thayer Drive, ECSC # 214 Department of Computer Science Dartmouth College Hanover, NH 03755	<i>E-mail:</i> <a href="mailto:sayanton.v.dibbo.gr@dartmouth.edu">sayanton.v.dibbo.gr@dartmouth.edu</a> <i>Phone:</i> 951 312 4333 <i>LinkedIn:</i> <a href="http://www.linkedin.com/in/svdibbo">http://www.linkedin.com/in/svdibbo</a>
---------------------	---	---

EDUCATION	<b>Dartmouth College</b>  Ph.D., Computer Science Area: Cybersecurity and ML	Hanover, NH  Fall 2020-Present
-----------	---	--------------------------------------

	<b>University of California, Riverside</b>  M.S., Computer Science GPA: 3.52/ 4.00	Riverside, CA  Spring 2019
--	---	----------------------------------

	<b>University of Dhaka</b>  B.Sc., Computer Science & Engineering GPA: 3.88/4.00 (Merit Position: <b>2<sup>nd</sup></b> in a class of <b>70</b> students.)	Dhaka, Bangladesh  August 2016
--	--	--------------------------------------

RESEARCH INTERESTS	Machine Learning, Model Transparency/Fairness/Robustness, Deep Learning, Mobile & Wearable Computing, Security and Privacy, Health Informatics.	
--------------------	---	--

RESEARCH EXPERIENCE	<b>Los Alamos National Laboratory (LANL)</b> <i>Graduate Research Intern, AI Assurance and Cybersecurity</i>	Los Alamos, NM Summer 2023
---------------------	---	-------------------------------

- Design Robust Deep Learning Audio classification models to mitigate adversarial attacks.
- Analyze data and implement techniques to prevent privacy attacks against Deep learning models.

	<b>The Financial Industry Regulatory Authority (FINRA)</b> <i>Graduate Research Intern, AI/ML &amp; Cybersecurity</i>	Boston, MA Summer 2022
--	--	---------------------------

- Leverage Pre-trained models (NLP) and design fine-tuned Deep Learning models on financial market data (text) to analyze security threats (e.g., backdoor, evasion, inference) that might leak sensitive data and disrupt market integrity.
- Implement a framework to identify possible data privacy threats to Deep Learning model, and develop robust and effective defenses against to safeguard and protect market data (financial institutions) and maintain financial market integrity.

	<b>Dartmouth College</b> <i>Research Assistant, CS Department</i>	Hanover, NH Fall 2020-Present
--	--	----------------------------------

- Investigating how the *generalizability*, *memorization*, and *robustness* of Large Language Models (LLMs) can aid in the development of effective defenses against adversarial attacks.
- Exploring the concept of *disparate vulnerability* in Model Inversion Attribute Inference privacy attack and designing an ML model to predict disparate vulnerability based on features computed only from training data instances.

- Designing Model Inversion Attribute Inference Attacks to ML model handling tabular data, that can outperform existing attacks to infer sensitive attributes of ML model training data.
- Developing phone-based implicit user authentication model. The goal is to design a framework to run the ML model on phones to authenticate IoT wearable users, based on implicit continuous biometrics.
- Analyzing and visualizing college students' phone call data to identify potential contexts and geo-temporal patterns of student phone call behavior.
- Analyzing cough data and designing cough models to identify cough vs. other sounds, also investigate impact of noise on generalized cough models.
- Collecting diabetic patients' data from insulin pump, continuous glucose monitor (cgm), and mobile devices to design ML models predicting blood glucose level.

**Dartmouth College**

*Research Intern, CS Department*

Hanover, NH

Fall 2019 - Summer 2020

- Developed smartphone application (android) to collect diabetic patients' sensor data including Accelerometer, GPS, Microphone, etc., data. This app also incorporates diabetic users' cgm (time-series) data records from users' cgm portal with their permission. Finally apply ML models and statistical methods to analyze factors affecting Diabetes.
- Worked in the Digital SMD project (*Developing Digital Tools for Improved Self-Management of Diabetes*) with the aim to leverage smartphones and wearable technologies for identifying trends or behavioral patterns associated with diabetes as well as developed data driven ML models to ensure better self management.

**Instituto Superior Técnico**

*Participant, 10<sup>th</sup> Lisbon ML School (LxMLS)*

Lisbon, Portugal

July 21-29, 2020

- Learning and implementing different aspects of ML: classifiers, tools, optimization techniques, gradient descent, L-BFGS algorithm, loss function, batch normalization, regularization, etc on real-life datasets.

**Cornell, Maryland, Max Planck**

*Student Participant, Pre-Doctoral Research School, MPI-SWS*

Saarbrücken, Germany

August 6-11, 2019

- Learning emerging research topics in Computer Science and experiencing cutting-edge research in computer science including computer systems/architecture, optimization, machine learning, deep learning model decision property, formal methods, AI, and data visualization.

**University of California, Riverside**

*Graduate Research Assistant, CSE Department*

Riverside, CA

Spring 2018 - Spring 2019

- Design and Implement the K-Nearest Neighbor-based predictive model to predict six major Human Activities - three static (sitting, lying, and standing) and three dynamics (walking, walking down, and walking upstairs) as well as postural transitions (e.g., stand-to-sit, sit-to-lie, lie-to-sit, stand-to-lie) from the accelerometer and gyroscope data of Human Activity Recognition (HAR) public data set of the UCI Machine Learning Repository, collected by the smartphone sensors of the users.

- Analyzed different feature selection techniques and incorporated the Genetic and Simulated Annealing algorithms to select the most important features in an efficient way to improve the overall prediction accuracy of human activities compared to the existing techniques used so far.

#### University of Dhaka

*Undergraduate Researcher, CSE Department*

Dhaka, Bangladesh  
Fall 2014 - Summer 2017

- Designed an improved and efficient division technique with reduced time complexity and introduced a new, compact tree-based quantum divider design algorithm to reduce the circuit depth and achieve better performance compared to the existing divider design techniques in area, power, depth, delay, and # of input lines.
- Developed an app for diabetic patients to facilitate their daily living by providing instructions (e.g., diet, exercise, and notification during emergency cases) according to their sugar level.

#### RELEVANT PROJECTS

Sparse-Guard: Sparse Coding based defense against privacy attacks    Los Alamos, NM  
*Research Project (Individual Project)*    Summer 2023

- Incorporate Sparse Coding layer on neural network architecture
- Analyze effectiveness of sparse coding layers against privacy attacks

Robust Audio Classification Modeling    Los Alamos, NM  
*Research Project (Individual Project)*    Summer 2023

- Design ML models preventing adversarial attacks
- Introduce neuroscience-based techniques to design robust audio classifiers

Large Language Model (LLM) Generalizability    Hanover, NH  
*Research Project (Individual Project)*    Winter-Spring 2023

- Leverage pre-trained large language models to analyze their robustness and generalizability
- Fine-tune language models for specific tasks to test their generalizability and memorization properties

Security for AI    Boston, MA  
*Research and Development Project (Team Project)*    Summer 2022

- Design efficient data privacy and security threats (NLP) to Deep Learning Models
- Detect and mitigate Deep Learning Model security threats

Disparate Vulnerability in ML Model Inversion Attack    Hanover, NH  
*Research Project (Individual)*    Winter 2022, Spring 2022

- Design model inversion attack against ML Models with the least adversarial capabilities
- Introduce disparity prediction model

Model Inversion Attribute Inference Attack (MIAI) on Tabular Data    Hanover, NH  
*Research Project (Individual)*    Fall 2021

- Introduce novel black-box MIAI attack against ML Models
- Analyze efficacy of proposed attack, and distributional privacy leakage

Biometric Authentication <i>Development Project (Team Project)</i>	Hanover, NH Winter 2021
<ul style="list-style-type: none"> <li>• Design ML and DL models for user authentication</li> <li>• Developing authentication models based on heart rate, breathing, gait features</li> </ul>	
Phone Call Trend <i>Data Analytics Project (Team Project)</i>	Hanover, NH Winter 2021
<ul style="list-style-type: none"> <li>• Predicting Geo-Temporal pattern of students' phone call behavior.</li> <li>• Analyzing social and contextual impacts on communication pattern</li> </ul>	
HealthMine <i>Development Project (Team Project)</i>	Hanover, NH Spring 2020
<ul style="list-style-type: none"> <li>• Design android app for collecting user sensor data.</li> <li>• Develop the way to redirect to 'dexcom' (CGM) app from our own app to collect user blood glucose data from CGM device after user authorization.</li> <li>• Conducting user study to get feedback</li> </ul>	
Digital SMD <i>Research Intern Project (Individual)</i>	Hanover, NH Fall 2019
<ul style="list-style-type: none"> <li>• Collecting and Analyzing Insulin Pump, Glucose Monitor Data.</li> <li>• Applying ML models to detect elements affecting Diabetes self-management.</li> <li>• Recommending diabetic patients based on identified pattern.</li> </ul>	
Human Activity Recognition <i>Research Project (Team Project of two)</i>	Riverside, CA Spring 2018
<ul style="list-style-type: none"> <li>• Predicting human activities based on smartphone sensor data set.</li> <li>• Constructing data mining models to classify human activities.</li> <li>• Demonstrating different feature selection techniques to test prediction accuracy.</li> </ul>	
Efficient Path Profiling in LLVM <i>Software Project (Team Project of two)</i>	Riverside, CA Spring 2018
<ul style="list-style-type: none"> <li>• Implemented the Edge Profiling of any arbitrary code and constructed the Ball-Larus Path Profiling algorithm.</li> <li>• Instrumenting the execution frequencies of different paths in any arbitrary code using the LLVM compiler infrastructure.</li> </ul>	
Mining Interesting Patterns from TSDB using Resampling <i>Research Project (Individual)</i>	Riverside, CA Fall 2017
<ul style="list-style-type: none"> <li>• Proposed a new and effective approach to mine all types of interesting periodic patterns without having any predefined period value or type from Time Series Database (TSDB).</li> <li>• Detecting all types of periodic patterns specially by skipping intermediate events using the proposed algorithm.</li> </ul>	
Place Identification Using Augmented Reality <i>Software Project (Team Project of ten)</i>	Dhaka, Bangladesh Fall 2015

- Developed a system or application that facilitates users to find information about an unknown place.
- Identifying places by capturing the image of the place while directing the phone to that place.

Diabetic Monitor App Dhaka, Bangladesh  
*Software Project (Team Project of ten)* Fall 2015

- Performed survey to collect data regarding diabetic patients.
- Developed an app to assist the diabetic patients to get information about foods, exercise and other tips based on their sugar level.

Bank Management System Dhaka, Bangladesh  
*Software Project (Individual)* Fall 2014

- Implemented customer accounts, deposits and payment modules to ensure secured and reliable banking system using JAVA.
- Ensured better management of data regarding customers bank account, transactions and history.

Cell-Phone Operated Land Rover Dhaka, Bangladesh  
*Hardware Project (Team Project of three)* Spring 2014

- Applied phone calls to control a remote robot based on button pressing.
- Implemented using dual tone multiple frequency (DTMF) technique.

Result Processing System Dhaka, Bangladesh  
*Software Project (Team Project of three)* Fall 2013

- Designed a secured and reliable result processing system for the university.
- Demonstrated most efficient and reliable software design technique to implement the software.

Automatic Traffic Light Control Dhaka, Bangladesh  
*Hardware Project (Team Project of three)* Spring 2013

- Implement a a traffic light control system to control traffic light consistently and accurately for maintaining proper flow of traffic.
- Used micro-controller and circuit chips to design the system with timer IC to ensure accuracy of traffic control.

POSTER  
PRESENTATIONS

1. **Dibbo, S. V.**, Moore, J. S., Kenyon, G. T., and Teti, M. A., “LCANets++: Robust Audio Classification using Multi-layer Neural Networks with Lateral Competitions”, *ACM International Conference on Neuromorphic Systems (ACM ICONS)*, Santa Fe, NM, August 2023.

INVITED TALKS

1. **Dibbo, S. V.**, “Robust Audio Classification”, *Center for Nonlinear Studies (CNLS), Los Alamos National Laboratory (LANL)*, Los Alamos, NM, August 2023.

HONORS &  
AWARDS

- **Inaugural Dartmouth Cybersecurity Research Cluster Pre-Doctoral Research Fellow**, prestigious Cybersecurity Research Fellowship by Dartmouth College January 2024
- **National Science Foundation (NSF) Secure and Trustworthy Cyberspace (SaTC) Aspiring PI** Award to attend the PI Workshop organized by the NSF SaTC program May 2023
- **Best Community-voted Presentation Award**, awarded by the EAI (SaSeIoT 2021) community for the best paper presentations April 2021
- **Dartmouth Fellow**, Guarini Graduate School, Dartmouth College September 2020
- **Dean’s Award (Gold Medal)**, Faculty of Engineering & Technology, University of Dhaka (one of the top 2 institutions in Bangladesh) for securing **Second** merit position in the B.Sc. Examination in Computer Science & Engineering, held in Dec 2015 (awarded to top 3 students) May 2018
- **Dean’s Distinguished Fellow**, Bourns College of Engineering, University of California, Riverside September 2017

- **Perfect Attendance Award**, Notre Dame College, Dhaka (best institution in Bangladesh) for maintaining 100% attendance during the two consecutive academic years of College (awarded to only 100% attendance holders) August 2011
- **First Place Winner**, Notre Dame College, Dhaka for securing the **First** merit position among the **1.7 million** secondary school certificate holders, participated in the competitive admission test across a country with **163 million** population (awarded to the top-most student) July 2009

TEACHING AND  
MENTORING  
EXPERIENCE

**Dartmouth College, Hanover**  
*Graduate Teaching Assistant*  
*Department of Computer Science*

Hanover, NH  
Fall 2020-present

- COSC 51: Computer Architecture  
(*class size: 50*) Fall 23  
*Tools: Ed Discussion, Canvas*
- COSC 89: Deep learning generalization and robustness  
(*class size: 20*) Spring 23  
*Tools: Piazza, Canvas*
- COSC 78: Deep Learning  
(*class size: 60*) Winter 23  
*Tools: Piazza, Canvas*
- COSC 58: Operating Systems  
(*class size: 60, 58*) Winter 22, Fall 22  
*Tools: Gitlab, Slack, Canvas*
- COSC 59: Principles of Programming Languages  
(*class size: 40*) Summer 21  
*Tools: Slack, Codechef competition*
- COSC 55: Security and Privacy  
(*class size: 35, 6*) Winter 21, Fall 21  
*Tools: Slack, Canvas*
- COSC 10: Problem Solving using Object Oriented Programming  
(*class size: 110-120*) Fall 20, Spring 21, Spring 22  
*Tools: Canvas, Slack*
- Undergraduate Student Mentoring Experience:
  - Dae Lim Chung (currently a MS student in CS at Columbia University)
  - Darley Sackitey (currently a PhD student in CS at Georgia Institute of Technology)
  - Arihant Chadda (senior UG)
  - Sylvester E. Coch (senior UG)

**University of California, Riverside**  
*Graduate Teaching Assistant*  
*Department of Computer Science & Engineering*

Riverside, CA  
Fall 2018-Winter 2019

- CS 61: Machine Organization and Assembly Language Programming  
(*class size: 110*) Winter 19  
*Tools: Github, Piazza, Gradescope*

- CS 152: Compiler Design  
(*class size: 30*) Fall 18  
*Tools: Piazza, Blackboard*

# **University of Dhaka**

Dhaka, Bangladesh

*Undergraduate Mentor*

Fall 2015

*Department of Computer Science & Engineering*

- Mentor and Section Leader:
  - Riaz Uddin (currently Maintenance Engineer, Ministry of Bangladesh)
- Research Collaborator & Coordinator:
  - Mubin Ul Haque (currently PhD Student in CS at University of Adelaide)
  - Md. Solaiman Mia (currently Lecturer in CS at Green University of Bangladesh)

## GRANTS & FELLOWSHIPS

- NSF SaTC Aspiring PI Workshop attending travel grant (\$2000) Summer 23
- Summer Research Fellowship, Center for Non Linear Studies (CNLS), Los Alamos National Lab (\$15000) Summer 23
- Dartmouth Graduate Student Council Conference Travel Grant (\$500, \$550) Fall 22, Winter 23
- Dartmouth College Fellowship (\$30k/yr) Fall 2020-2025
- Higher Study Travel Grant, Bangladesh-Sweden Trust Fund, Ministry of Economic Relations, Bangladesh (\$800) Fall 2018
- Dean's Distinguished Fellowship, Bourns College of Engineering, University of California, Riverside (\$52,000 for 1 year) Fall 2017
- Dhaka University Alumni Association (DUAA) Scholarship, University of Dhaka (\$400) Fall 2015
- Shamshul Haque Trust Fund Fellowship, University of Dhaka (\$1200) Fall 2015
- Mitsubishi UFJ Foundation Scholarship, Mitsubishi Corporation, Tokyo, Japan (\$3000) Fall 2015
- Higher Secondary School Scholarship, Education Board Dhaka (\$500) Fall 2012
- Full-free Studentship, Notre Dame College, Dhaka (\$400) Fall 2010
- Secondary School Scholarship, Education Board Dhaka (\$300) Spring 2010
- The Scholar's Forum Scholarship, Scholars Forum, Dhaka (\$200) Fall 2008
- Full-free Studentship, St. Gregory's High School & College (\$400) Fall 2007
- Junior School Scholarship, Education Board Dhaka (\$500) Spring 2007
- Gregorian Scholarship, St. Gregory's High School & College (\$200) Fall 2007
- Primary School Scholarship, Education Board Dhaka (\$100) Fall 2004

LEADERSHIP &  
SERVICE

- Research Poster Presentation, *International Conference on Neuromorphic Systems (ACM ICONS)*, Santa Fe, NM 2023
- PC (Program Committee), *USENIX Security* Artifact Evaluation 2022-2023
- Represent Dartmouth College Graduate Student Council (GSC) on new student orientation/the activities fair Fall 2021
- Co-chair of *Committee for Addressing Racism and Equity (CARE)*, Dartmouth College Graduate Student Council (GSC) 2021-2022
- Participant of *Graduate Student Leadership Training*, Dartmouth College 2021
- Volunteer at *ACM Ubicomp Conference* at London, UK 2019
- Mentor at *BioHack 2019*, Hackathon of Biomedical Engineering Society Chapter, UC Riverside 2019
- Participant of ‘*Leadership in Action Program*’ at UC Riverside 2018
- Volunteer, ‘*Tobacco Free Environment Campaign*’ at UC Riverside 2018
- Volunteer, *Martin Luther King Day* at UC Riverside 2018
- keynote speaker in ‘*Fresher’s Reception Ceremony*’ at Notre Dame College 2009
